HOW TO PLAY STAR WARS BATTLESHIP
By: Joaquin

Intro:

In this game, you get to become a general in either the Rebel Alliance or the Galactic Empire and fight in the galactic Civil War. Sending your cruisers and star fighters into the battle, you must defend them by going on the offensive, sending either Y-wing bombers or Tie bombers to destroy the enemy fleet. If you destroy all the enemy ships before they can destroy yours, you win.

Start Screen:

After running the program you should see the Start Screen. To continue on to the next screen, press Start.

Pick A Side Screen:

After clicking the Start button, you will be taken to the Pick A Side Screen. Choose the team you want to play as, whether the Rebel Alliance, or the Galactic Empire. Press Rebels to choose the Rebel Alliance and Press Empire to choose the Galactic Empire.

Ship Select Screen:

The Ship Select Screen has three parts to it. On the right of the screen, you can see your ships represented by squares, as well as how they appear in space on the holo-screen. By clicking the Radial buttons, you can choose which ship you would like to select.

The second section is the cpu difficulty slider. There are three levels of difficulty which you can choose by moving the slider.

The third part of the screen is the actual board. By clicking a point on the board, you can see the outlines of the possible places of the ship you selected with the Radial buttons. By clicking one of the yellow buttons the ship will be placed. After placing a ship on the board, the next ship will automatically be selected. Once you have placed all four of your ships, you are ready to play, and you will be sent to the next screen.

Game Screen:

On this screen, there are two boards. The left board is your attack screen where you will order your bombers to destroy the enemy fleet, by clicking the desired position. If the position turns white, it means you missed. If it turns red, it means you hit a part of an enemy ship and if a group of red positions turn orange, then you have successfully destroyed the whole ship.

On the right board, you will see the ships you placed, and as you send bombers at their ships, they will send bombers to yours in an alternating turn order. You will see each attack, miss, and your own destroyed ship on this board.

If you successfully destroy your opponent's fleet before they destroy your fleet, then you will win. If they destroy your fleet first, then you will lose.

End Screen:

Depending on whether you destroy the opponent's fleet or they destroy yours, you will get a Win Screen or a Lose Screen.

Thank you for playing :)
